Constructor Detail

Shopping

```
public Shopping()
```

Method Detail

Electronics

```
public static void Electronics()
```

Function for Electronics category

Fashion

```
public static void Fashion()
```

Function for Category of clothing and fashion

Books

```
public static void Books()
```

Function for categories of books

Sports

```
public static void Sports()
```

Function for categories of sports

Bill

```
public static void Bill()
```

Billing function

main

```
public static void main(java.lang.String[] args)
```

Main function
